

Performance Report

Specialized Engineering — August 4, 2026 - September 3, 2026

Introduction

Welcome Specialized Engineering

Executive Summary

The most striking shift is the 66.7% drop in sessions (2 vs 6) and the 60% decline in total and new users, indicating a serious traffic loss. The only bright spot is engagement: average engagement time jumped from 8 seconds to 1 minute 18 seconds and the engagement rate rose from 33.33% to 50%, driven entirely by the two desktop sessions. Direct traffic collapsed by 83.3% (1 session vs prior period) while Paid Search contributed a single, non-engaged session. Revenue remains at \$0, reflecting the loss of volume despite deeper engagement.

Key Metrics at a Glance

SESSIONS	TOTAL USERS	NEW USERS	PAGE VIEWS
2	2	2	2
-66.7%	-60.0%	-60.0%	-71.4%

Sessions by channel (this period vs previous)

Channel	Sessions	Change	Engaged	Key events
---------	----------	--------	---------	------------

Direct	1	-83.3%	1	0
Paid Search	1	new	0	0

Sessions by device (this period vs previous)

Device	Sessions	Change	Engagement rate
desktop	2	new	50.0%

Top landing pages (this period)

Landing page	Sessions	Engagement rate	Key events
/	2	50.0%	0

Performance Trend

Recommendations

1. Diagnose the 83% fall in Direct sessions (now only 1) by reviewing URL-level tracking and referral sources; fixing attribution gaps should help recover the majority of the missing sessions and potentially lift total users back toward the prior level of 5-6.
2. Optimize the desktop landing experience—currently the only device with sessions (2) and a 50% engagement rate—by adding clear calls-to-action and streamlining form fields; this can convert the high-engagement visits into the first recorded conversions.
3. Refine Paid Search targeting and ad copy, as the new channel delivered 1 session with zero engagement; aligning keywords and landing page content should increase the engaged-session share from paid sources, which could offset the Direct decline.

Conclusion

Traffic volume is sliding while engagement improves; the next period’s priority is to stop the session drain—especially from Direct—while capitalizing on the strong desktop engagement to generate conversions.
